EXAMINER

WILSON, JACQUELINE B

ART UNIT PAPER NUMBER

2612

DATE MAILED: 05/18/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/024,913

Applicant(s)

FIFE ET AL

Examiner

Jacqueline Wilson

Art Unit

2612

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 December 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-38 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 and 38, drawn to a digital camera comprising a control subsystem, an imaging subsystem, a power management subsystem comprising a power selection-isolation circuitry, battery charging circuitry, and power arbitration circuitry, classified in class 348, subclass 372.
 - II. Claims 19-22, drawn to a camera body having a tongue and groove configuration comprising a front cover, a rear cover, a first rail, and a second rail, wherein the front cover and rear cover are held in substantial parallel alignment when the front edge lip and rear edge lip are received in the groove of the first rail and second rail respectively, classified in class 348, subclass 373.
 - III. Claims 23-24, drawn to a rechargeable camera power source comprising a printed circuit board having a first side, a second side and a pair of conductive pads disposed on the second side, and a rechargeable battery comprising a planar battery body disposed substantially parallel and adjacent to the first side of the printed circuit board, and a pair of conformable battery terminals, classified in class 348, subclass 375.
 - IV. Claims 25-34, drawn to a retractable and extendable lens holder comprising a lens mount, a camera body surface, and a biasing

component disposed between the lens mount and the camera body surface, classified in class 348, subclass 335.

- V. Claims 35-37, drawn to a digital camera comprising a camera body, a lens holder, a viewfinder objective lens, a viewfinder eyepiece, wherein a working length of the viewfinder objective lens and the viewfinder eyepiece is greater than the thickness of the camera body, classified in class 348, subclass 333.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention I includes control subsystems with power management arrangement and does not require the specific housing arrangement including a front cover, a rear cover, a first rail, and a second rail.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention I includes control subsystems with power management arrangement and does not require the specific accessory of a printed circuit board and rechargeable battery components.

Art Unit: 2612

Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention I includes control subsystems with power management arrangement and does not require the arrangement of a retractable and extendable lens holder assembly.

Inventions I and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention I includes control subsystems with power management arrangement and does not require a camera body, lens holder, viewfinder objective lens, and viewfinder eyepiece.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention II includes the specific housing arrangement including a front cover, a rear cover, a first rail, and a second rail and does not require the specific accessory of a printed circuit board and rechargeable battery components.

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 2612

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention II includes the specific housing arrangement including a front cover, a rear cover, a first rail, and a second rail and does not require the arrangement of a retractable and extendable lens holder assembly.

Inventions II and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention II includes the specific housing arrangement including a front cover, a rear cover, a first rail, and a second rail and does not require a camera body, lens holder, viewfinder objective lens, and viewfinder eyepiece.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention III includes the specific accessory of a printed circuit board and rechargeable battery components and does not require the arrangement of a retractable and extendable lens holder assembly.

Inventions III and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention III includes the specific accessory of a

Art Unit: 2612

printed circuit board and rechargeable battery components and does not require a camera body, lens holder, viewfinder objective lens, and viewfinder eyepiece.

Inventions IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention IV includes the arrangement of a retractable and extendable lens holder assembly and does not require a camera body, lens holder, viewfinder objective lens, and viewfinder eyepiece.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacqueline Wilson whose telephone number is (571) 272-7322. The examiner can normally be reached on 8:30am-5:00pm (alternate Fridays off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wendy Garber can be reached on (571) 272-7308. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

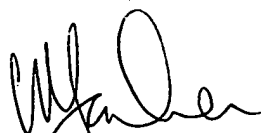

Art Unit: 2612

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
